

# The oil-coat on the beard

The problem in shaving, and the cause of faulty methods, now solved by Palmolive Shaving Cream. Hot towels and finger-rubbing eliminated

This is to acquaint you with a new kind of shave. A shave such as you've never before known.

Send us no money. Simply mark and mail the free coupon. We will send you a trial tube of Palmolive Shaving Cream free and post-paid.

Note what a difference this cream makes. No hot towels. No rubbing the beard with the fingers.

You simply put a bit of the cream on your face, which it up into a lather with the wet brush—and your beard is ready for the razor!

## Quick action

Every hair of the beard has an oil-coat. Palmolive lather instantly emulsifies that oil. Then the beard—a horny substance—quickly absorbs the water. It absorbs 15 per cent of water within one minute after lathering. And that makes a wiry beard wax-like.

Hot towels, which make the skin tender, are not needed with Palmolive. Neither is finger rubbing, which means delay just when men are most in a hurry.

## Both lather and lotion

This lather is creamy and tenacious. It stays moist and foamy 10 minutes.

Palmolive is also a lotion. It contains palm and olive oils. So the tenderest face requires no other application.

## Try it free

Learn how quick and easy shaving can be. Learn what a delight it can be. Put Palmolive to the test, at our expense.

Send today for a free trial tube. The results will amaze you. Mail the coupon now.

Large size tube at drugists, 35c

A single tube supplies 152 shaves. For Palmolive multiplies itself in lather 250 fold. One-half a gram—a mere bit—suffices for a shave.
